Communications Technicians Apprenticeship
Communications Technicians Apprenticeship

Description

Communications Technicians will install cable systems, maintain and repair structured cabling installations to meet the communication needs required to provide a wide range of residential and commercial services in telephone service and computer networks. Systems to be learned include: Voice - Telephone, modem, fax; Data - Local, Metropolitan and Wide Area Networks; Video - Cable TV, closed circuit, video-conferencing via ISDN.

Application Process

Applications are accepted on an ongoing basis.

Notes

- Be at least 18 years of age. There is no maximum age.
- Have a high school diploma or GED certificate.
- Have a valid driver's license. Many employers require a DMV printout showing a good driving record.
- Purchase tools and equipment (estimated cost $250.00)

Program Length

To be an apprentice you must first be employed by a signatory union employer. During your apprenticeship you will work and attend related training classes, which will include hands-on job-training tasks. On-the-job training and instruction will enable you to become an installer able to meet BICSI certification and who installs to the ANSI/TIA/EIA standards. Communications Technician is a career step in the growing telecommunications installation profession.
