Surveyors Apprenticeship
Surveyors Apprenticeship

Description

A surveyor is one who has the ability to use mathematics as a means to visualize objects, measure distances, sizes, and other abstract forms. They have to work with precision and accuracy because mistakes can be costly. Surveying is a cooperative process, therefore strong interpersonal skills and the ability to work, as parts of a team are important. Entry-level surveyors will learn and acquire leadership abilities that are important for party chiefs and other supervisory positions.

Application Process

Applications are accepted on an ongoing basis.

Notes

* An applicant for the training program must be at least eighteen (18) years of age.
* An applicant must be in good health and physically able to perform all phases of the work.
* An applicant must possess a current, valid driver’s license. This license is to remain current during the entire term of apprenticeship.

(Note: the qualification requirements are different for the southern counties than the northern counties, please go directly to the web sites for further information)

Program Length

The term of apprenticeship requires eight (8) periods of training with 1000 work hours and 72 class hours in each period.
